**LETTER OF TRANSMITTAL**

**OFFICE OF PUBLIC SERVICE COMMISSION**

*To His Excellency, James B. Edwards, Governor of South Carolina:*

Sir:

We have the honor to transmit herewith the Ninety-Seventh Annual Report of the Public Service Commission of South Carolina for the year ending June 30, 1975.

Yours respectfully,

ABNEY A. SMITH, Chairman

RUDOLPH MITCHELL, Vice-Chairman

GUY BUTLER

FRED A. FULLER, JR.

J. LEWIS MOSS

J. HENRY STUCKEY

HENRY G. YONCE

JAMES H. STILL, JR.

Director of Administrative Services

## ANNUAL REPORT OF THE PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA

*To the General Assembly of South Carolina:*

The Public Service Commission has the honor to respectfully submit for your consideration this its Ninety-Seventh Annual Report.

Below is the personnel of the present Commission and the Counties comprising the seven districts.

### *Sixth District*

J. Henry Stuckey, .....Kingstree, S. C.  
Darlington, Dillon, Florence, Georgetown, Horry, Marion, Marlboro, Williamsburg

### *Seventh District*

Henry G. Yonce .....Columbia, S. C.  
Calhoun, Lee, Lexington, Orangeburg, Richland, Sumter

### *First District*

Abney A. Smith, Chairman .....Charleston, S. C.  
Berkeley, Charleston, Clarendon, Colleton, Dorchester

### *Second District*

Rudolph Mitchell, Vice-Chairman .....Saluda, S. C.  
Aiken, Allendale, Bamberg, Barnwell, Beaufort, Edgefield, Hampton, Jasper, Saluda

### *Third District*

Guy Butler .....Greenwood, S. C.  
Abbeville, Anderson, Greenwood, McCormick, Newberry, Oconee, Pickens

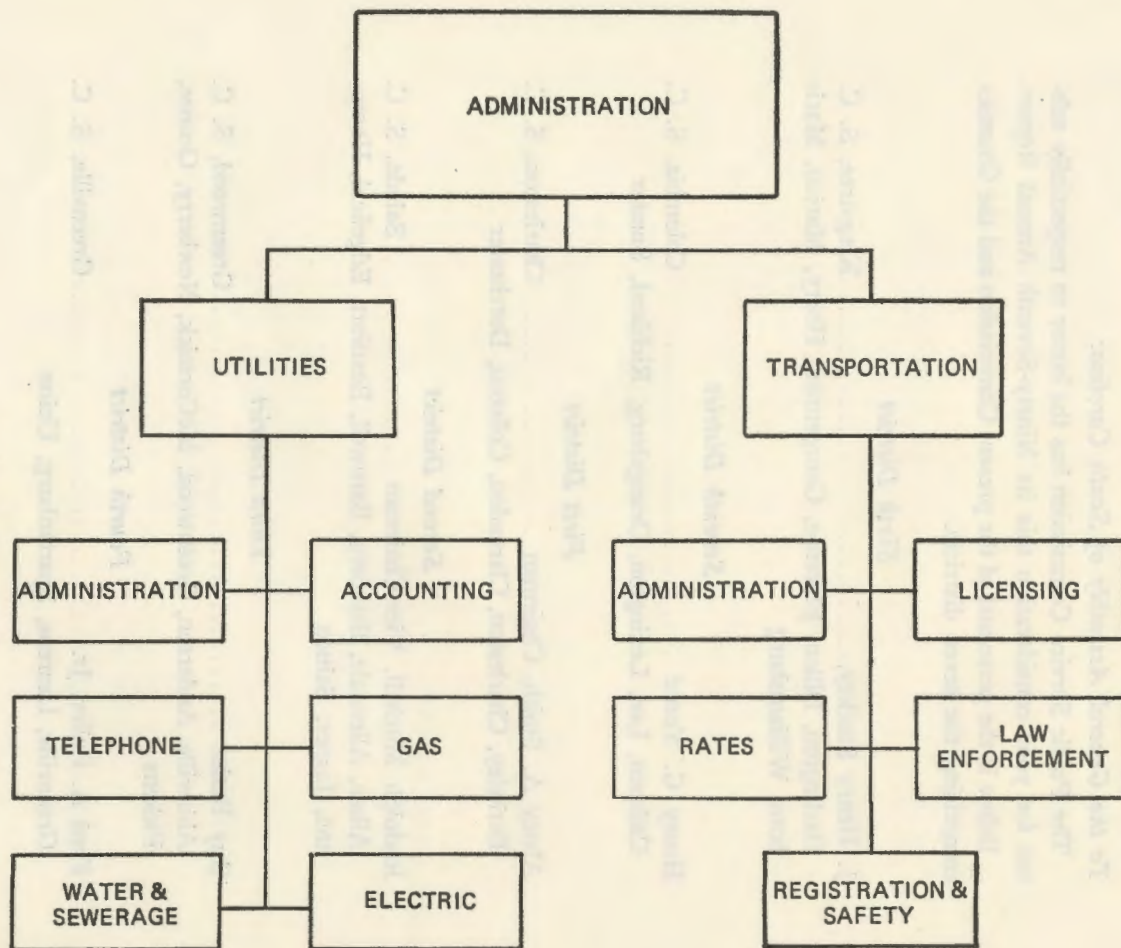

### *Fourth District*

Fred A. Fuller, Jr. ....Greenville, S. C.  
Greenville, Laurens, Spartanburg, Union

### *Fifth District*

J. Lewis Moss .....York, S. C.  
Cherokee, Chester, Chesterfield, Fairfield, Kershaw, Lancaster, York

## TABLE OF CONTENTS

	PAGE
Commissioners .....	3
Organizational Chart .....	4
Summary of Expenditures .....	6

Registration & Safety Department .....	68

## SUMMARY OF EXPENDITURES

### A. EXPENDITURES

I. Commissioners .....	\$ 269,953
II. Administration .....	200,692
III. Utilities .....	474,859
IV. Transportation .....	829,932

GRAND TOTAL (PUBLIC SERVICE COMMISSION) .....	<u>\$1,775,436</u>
--	--------------------

### B. SOURCE OF FUNDS

#### I. State Appropriations:

A. Balance from Prior Year .....	\$ 80,132
B. General Appropriation Act .....	1,561,631
F. Less	
Budget and Control Board Reduction Lapsed .....	—54,600
Carried Forward .....	—74,149
Civil Con't Fund .....	25,404

Total State Appropriation .....	<u>\$1,538,418</u>
---------------------------------	--------------------

#### II. Departmental Revenue:

B. Other Funds (See Revenue Statement) ....	237,018
---	---------

TOTAL FUNDS .....	<u>\$1,775,436</u>
-------------------	--------------------

Utility regulation in South Carolina had its beginning with the passage of an Act by the 1878 General Assembly, creating a Railroad Commission for the purpose of regulating railroads operating within the State. The first commissioner was appointed December 24, 1878, by the then Governor Wade Hampton.

The General Assembly in 1910 established a Public Service Commission, empowering it with the authority to "fix and establish in all cities of this State rates and charges for the supply of water, gas or electricity furnished by any person, firm or corporation to such cities, the inhabitants thereof, and to prescribe penalties."

The 1922 General Assembly combined the two three-man commissions and added one additional commissioner to form the present seven-man Commission. The name was changed in 1934 to The Public Service Commission.

The present Commission is elected by the Joint Assembly for a term of four years, one from each of the seven Commission Districts.

Authority vested in this body by Statute is to:

1. Regulate and supervise the privately-owned electric utilities as to their rates, charges, services, facilities, practices, accounting procedures, the purchase, sale or lease of utility property and the issuance of securities, as well as administer the Rural Electric Co-operative Act pertaining to territorial boundaries.

2. Approve rates and supervise services of all privately and publicly-owned telephone and telegraph companies within the State.

3. Regulate rates and charges, services, facilities, practices and accounting procedures of all intrastate privately-owned gas, water and sewerage companies, and administer the Gas Safety Act enacted by the 1970 General Assembly.

4. Supervise and regulate for-hire motor carriers of persons and property as to authorities, rates, services, charges, schedules, insurance, safety, practices and facilities. Consider applications for Certificates of Public Convenience and Necessity, revoke and suspend same for cause. Issue drivers' permits. The Registration and Safety Act, as passed by the 1970 General Assembly, is also administered by this agency. Enforcement of the rules and regulations of the Transportation Division by uniformed Inspectors in marked patrol cars throughout the State.

During the past fiscal year, the Transportation Division dispensed license tags to 9,085 operating units varying in price from \$7.50 to \$125 each, according to payload and issued 14,955 drivers' permits. The various fees assessed produced a revenue of \$1,526,304.

As of June 30, 1975, fifty-nine electric, gas, and telephone utilities were operating within the State with a total plant investment of 3.13 Billion Dollars generated gross revenue of 979.4 Million Dollars. The 159 water and sewerage companies operating within the State generated 3.2 Million Dollars of gross revenue.

The monies appropriated for these functions are obtained as follows:

Electric, gas, telephone, telegraph, radio common carrier, rail, water and sewerage companies are assessed on a gross revenue basis for the operation of the Administration and Utilities Divisions. The funds for the operation of the Transportation Division are deducted from the fees collected from the sale of licenses. The remainder is deposited with the State Treasurer for distribution to the cities and towns, which amounted to approximately Three-Quarters of a Million Dollars this last fiscal year.

Revenues from the registration of trucks and the sale of identification stickers are used to defray operating expenses appropriated for the administration of the Registration and Safety Act. Any remaining funds are deposited with the State Treasurer.

From the tremendous growth of industry in the State in the past several years, coupled with the expanding economy, as evidenced by the above figures, conservative projections indicate that utility installations will more than double within the next ten years. During the past fiscal year, the Commission processed one thousand sixty-seven (1,067) applications; hearings were held thereon when necessary, and Orders issued.

### **UTILITIES DIVISION**

The function of the Utilities Division of The Public Service Commission is to perform the necessary duties related to the regulation of utilities under the jurisdiction of the Commission. The administrative staff plans, coordinates, directs and supervises the work of its five departments as shown below:

- I Accounting Department
- II Electric Department
- III Gas Department
- IV Telephone and Telegraph Department
- V Water and Sewerage Department

The activities of this Division for the fiscal year 1974-1975, affecting the various utility groups, are summarized by each Department on the following pages of this report. One hundred and sixty Orders were issued through this Division during the fiscal year, and public hearings were held in connection with eighty-four of these.

### **GAS DEPARTMENT**

There are five private corporation natural gas utilities serving customers in South Carolina. The rates and services of these utilities are subject to jurisdiction of the Public Service Commission. The natural gas utilities and the communities they serve are listed in the tables included in this report.

Natural gas brought into South Carolina is produced principally in the gas fields of Louisiana and Texas including the offshore areas in the Gulf of Mexico. The gas is transported to South Carolina by two interstate pipeline companies: the Transcontinental Gas Pipeline Company and the Southern Natural Gas Company. Transconti-

mental's pipeline crosses the state in the northwest corner passing just south of Anderson and Spartanburg, South Carolina, while Southern's pipeline terminates at a point near Aiken, South Carolina. All natural gas consumed in South Carolina is furnished by these two interstate pipelines which furnish gas to natural gas authorities and municipally owned gas utilities as well as the privately owned utilities.

The Federal Power Commission has jurisdiction over rates and services of interstate pipeline companies and the price of natural gas sold by producers to interstate pipelines. These price fluctuations have a direct bearing on the cost of natural gas to the ultimate consumer in South Carolina. During the past year, the Public Service Commission has participated in several proceedings before the Federal Power Commission to protect the interests of the people and the gas utilities in South Carolina.

The Commission received a number of complaints regarding services and charges from customers of the gas utilities. Each inquiry was investigated and handled informally without necessity of a special hearing.

Many communities in South Carolina are receiving natural gas service through facilities owned by municipalities or gas authorities over which the Commission has no rate or service jurisdiction. However, the South Carolina Gas Safety Act of 1970 vested the Commission with pipeline safety jurisdiction over all gas system operators not subject to Federal Power Commission jurisdiction. Therefore, pipeline safety jurisdiction includes public utilities, municipalities, natural gas authorities, certain public housing authorities and others who purchase natural gas through a master meter for subsequent distribution to individual consumers. As of June 30, 1974, there were 38 such operators.

During Calendar Year, 1974, representatives of the Commission made 402 inspections of natural gas systems to ensure compliance with the South Carolina Gas Safety Act and the Minimum Federal Safety Standards for Natural Gas Pipelines. One hundred and two violations were found during these visits and as of December 31, 1974, the Commission Staff verified compliance covering ninety-three of these violations. The remaining violations necessitate continued monitoring to substantiate that they are corrected and brought into compliance with the Pipeline Safety Standards. An investigation was made of one accident to determine whether natural gas pipelines were involved.

As indicated by the accompanying tables, the demand for natural gas in South Carolina has resulted in sales growth in recent years, but due to the present dwindling supplies, this growth is being adversely affected. Its characteristics as an efficient and pollution-free fuel has created a nation wide demand of such proportions that our existing domestic supply cannot meet the needs. Most gas utilities have been forced to curtail expansion of their residential, industrial, and commercial "firm gas" market. Some limitations have also been placed on segments of the industrial "interruptible gas" market. During the fiscal year covered in this report, the Commission held extensive hearings and conferences concerning the increasing curtailments of natural gas to our utilities.

Agencies of the Federal Government and State Commissions have taken actions designed to increase exploration for new gas reserves within the continental United States and offshore areas. In our State, one Company has been granted Commission approval to engage in exploration activities designed to increase the supply of gas to the Company's System.

Two factors showing the pace of activity by natural gas utilities are the average number of customers and the gross plant investment. The growth in total customers served by each privately owned gas utility is shown by one of the accompanying tables. The total of natural gas customers grew from 179,541 in 1970 to 219,050 in 1974 for an increase of 22% over the five years.

Four hearings for increases in rates were held during the fiscal year covered in this report. However, rates were adjusted in accordance with approved purchased gas adjustment clauses in the tariffs. These fluctuations resulted from changes in rates of interstate pipeline companies who supply gas to South Carolina. Some of these rate changes were retroactive decreases which resulted in refunds being passed to the customer through billing credits.

## GAS OPERATIONS IN SOUTH CAROLINA, JUNE 30, 1975

## **WATER AND SEWERAGE DEPARTMENT**

The majority of water and sewerage utilities operating in the State of South Carolina are owned and operated by municipalities and public water districts and are exempt, by state statute, from jurisdiction of the Public Service Commission. The cities of Anderson, St. George, and Walterboro are provided water service by privately owned utilities and therefore are regulated by the Public Service Commission.

The number of water systems increased by a total of 58, and the number of sewerage systems increased by a total of 34 during the past fiscal year, which makes a total number of 202 water and sewerage systems operating within 159 water and sewerage companies under the jurisdiction of the Public Service Commission in operation June 30, 1975.

There were 10 new water or sewerage utilities granted Certificates of Public Convenience and Necessity during the fiscal year and 11 water or sewerage utilities that were granted certificated areas under formally organized corporations.

More stringent demands by state and federal agencies, higher operating and maintenance costs, wages and supplies caused 19 water and sewerage companies, operating in this state, to apply to the Commission for authority to increase their rates and charges for water and sewerage service.

As prescribed by law and after proper advertisement, Public Hearings were held on each application for adjustments in water and sewerage rates and charges.

The problems of water and sewerage utilities continue to be problems for the Public Service Commission. The Public Service Commission received a substantial number of customer complaints during the fiscal year. These complaints fell into one of two categories, either service or billing; each complaint was investigated and settled informally, or if necessary, resolved through Public Hearings.

Prior to issuing a Certificate of Public Convenience and Necessity to a water or sewerage utility, the Commission, among other things, requires a performance bond in accordance with Section 58-149 of the 1962 Code of Laws of South Carolina as amended, complete cost and rate data, approval of adequate design, and supply potential, plat of proposed area to be served and copy of engineering plans and specifications.

## TELEPHONE AND TELEGRAPH DEPARTMENT

The Telephone and Telegraph Department of the Utilities Division is responsible for the work necessary in the regulation of rates and services pertaining to 32 telephone utilities, one telegraph utility, as well as 15 radio common carrier companies. The Staff of this department investigates, and makes every effort to resolve all complaints involving rates and service, territorial disputes and requests for boundary changes.

Field Inspections of telephone plant in use and under construction are made. When construction is completed, tests and other observations are made to determine the quality and adequacy of service. The staff also maintains an updated file on all tariffs, territorial maps, and other pertinent data. The exhibits and materials submitted with rate applications are thoroughly reviewed before being introduced at a hearing.

During the fiscal year, the Telephone and Telegraph Department processed in excess of 550 customer complaints. The telephone subscribers of today expect better service without delays, failures, or inaccurate billing. Due to these and other reasons, the staff of the Telephone Department performed tests in eighteen (18) central offices during the year to determine the condition of the equipment and grade of service being rendered. The results of all tests performed by this staff were reported to the company management, in hopes that it would provide another tool for their use in improving telephone service in South Carolina.

During the past year most telephone utilities, continued to make large investments to improve their outside plant, central office, and toll equipment in an endeavor to cope with the ever expanding telephone industry.

The Commission held 12 formal hearings involving telephone, radio common carrier, territory, and merger matters during the year and all interested parties were given a chance to be heard. A decision was rendered on all 12 hearings. In addition, approximately 450 tariff sheets covering new service or change in language were reviewed by the staff and approved by the Commission without formal hearings.

We are showing below some of the more notable Telephone Utilities accomplishments which occurred during the period of July 1, 1974 through June 30, 1975.

Southern Bell Telephone and Telegraph Company started or completed the following:

New Columbia-Dutch Square Traffic Service Position System (TSPS) No. 1 was placed in service in Columbia, S. C.

New No. 2-A ESS which replaces 355-A Trailer in Lake Wylie, S. C. was placed in service.

Construction was started on new building to house the new No. 2 ESS which will replace 35-E-97 equipment in Pickens, S. C.

New No. 2 ESS which replaces 35-E-97 equipment in Cheraw, S. C. was placed in service.

New No. 1. ESS which replaces a portion of step by step equipment in Columbia—Downtown office was placed in service in Senate Street office in Columbia, S. C.

New No. 2 ESS which replaces both 35-E-97 units in Pelzer and Williamston was placed in service in the new Pelzer-Williamston office.

New No. 1 ESS which replaces portion of step by step equipment in Spartanburg Dial and Toll office was placed in service.

Construction began on Columbia-Dentsville TSPS building which will house second TSPS No. 1 operator unit in Columbia, S. C.

Installation began on new No. 2 ESS, Abbeville Highway office in Anderson, S. C.

New No. 5 Automatic Call Distributor (#5ACD) Directory Assistance operator unit was placed in service in Dutch Square TSPS building in Columbia, S. C.

New 4-A Crossbar Toll System which replaces Crossbar Tandem System in Greenville, S. C. was placed in service.

Educational Television during the school year ending May 31, 1975 was as follows:

Schools .....	227
Hospitals .....	20
Higher Education (USC) .....	10
Tec Centers .....	19
Vocational Schools .....	8
Other Higher Education .....	14
Police Departments .....	5
Miscellaneous .....	28
<hr/>	
Total .....	331

General Telephone Company of the Southeast reported the following achievements :

An electronic common control Traffic Service Position System was placed in service in Myrtle Beach, providing O+ dialing and faster long distance service to 6 communities and approximately 27,500 main stations served by the Company. These communities are Andrews, Conway, Georgetown, Myrtle Beach, North Myrtle Beach and Pawleys Island. Three connecting company exchanges are also involved.

Automatic Number Identification was provided to 9 communities and approximately 32,500 main stations. These communities include the 6 under Item I above plus Fairfax, Summerton and Winnsboro.

Direct Distance Dialing was provided to the community of Olar extending coverage to 29 of the 30 exchanges served and 99.3% of all customers.

Direct Inward Dialing was provided to Myrtle Beach Air Force Base.

Centralized Service Observation and Traffic Measurement Systems were established at the Myrtle Beach Toll Center for sampling quality of service in all tributary exchanges.

Emergency generators, providing standby power in the event of commercial power failure, were installed for the Myrtle Beach and Sumter central offices.

The Company gained only 1,819 main stations, the lowest level of growth in recent history.

United Telephone Company of the Carolinas, Inc., reported the following :

1. During the fiscal year the expenditures for inside and outside plant additions and replacements in South Carolina were \$4,237,157.
2. Construction was somewhat curtailed due to the economic situation, but the Company managed to reduce their held orders for new service substantially.
3. The Company instituted a program of facility management whereby all essential requests for service would be filled as promptly as possible.
4. The Company will continue to concentrate on improving the quality of service in certain areas.

## GROWTH OF TELEPHONE UTILITIES IN SOUTH CAROLINA

Year	Gross Operating Revenue (Millions of Dollars)	Gross Plant Investment (Millions of Dollars)	Total No. of Telephones (Thousands)
1966 .....	83.1	394.4**	850.3

### **ELECTRIC DEPARTMENT**

The Electric Department is responsible for providing the Commission with data and information necessary for the regulation of the privately-owned Electric Utilities operating in South Carolina. The Commission requires the Electric Utilities under its jurisdiction to provide adequate service at reasonable rates that provide the Utilities with not more than a reasonable return on the fair values of properties devoted to the public service.

The Electric Department also handles service and high bill complaints and during the fiscal year 297 formal complaints were investigated. Numerous other complaints and requests for information were received over the telephone and were handled without a formal investigation.

During the 1974-75 Fiscal Year the several Electric Utilities under jurisdiction of this Commission continued to improve their systems to make more and better service available to the customers on their lines.

Each of the three large electric utilities are planning and building new generating plants, transmission and distribution lines so that adequate electric power will always be available for present customers and any others that may locate in this State.

South Carolina customers are receiving some power from the Clark Hill Project and Hartwell Project through transmission lines of South Carolina Public Service Authority, Duke Power Company and South Carolina Electric and Gas Company.

The major utilities operating in South Carolina as well as neighboring utilities in Georgia and North Carolina are connected by numerous high voltage transmission lines and, in case of emergency, power is transmitted between the interconnected companies affording the ultimate consumer a better and more continuous supply of power.

The VACAR Group of the Southeastern Electric Reliability Council is a group of electric utilities operating in Virginia, North Carolina and South Carolina. The Reliability Council, Regional and National, were formed to increase the reliability of the bulk electric power supply of the National and the several Area Councils.

Carolina Power and Light Company, Duke Power Company, South Carolina Electric and Gas Company, South Carolina Public Service Authority, Virginia Electric and Power Company and several smaller utilities are in the VACAR Group and these companies exchange information on planning, construction, system loads and other matters affecting the bulk power supply of this area.

The South Carolina residential electric consumer, after having enjoyed continually decreasing costs, has now begun to feel the effects of inflation. On account of the rapidly increasing costs of money, fuel and other items that go into the cost of providing electric service, the Commission has granted the electric utilities under its supervision increases in rates in order that the companies can continue to provide adequate electric service. In spite of these increases, the average South Carolina residential consumer pays an average of only 2.78 cents per KWH compared to the national average rate of 2.83 cents per KWH.

A chart has been prepared comparing the residential electric consumption and the average price paid by the South Carolina consumers with the average consumption and average price paid by the average United States Consumer. This chart is printed on one of the following pages.

It is believed that there is no power shortage in South Carolina, and further that the organizations in South Carolina that generate and sell electric service will provide adequate power at reasonable rates for the present and future needs of this State. In fact, at this time, there are new generating facilities under construction by both privately-owned and publicly-owned utilities within the State.

During 1974, Duke Power Company's Oconee II Nuclear Station and Carolina Power and Light Company's Darlington County Combustion Turbine Generating Station have been placed in operation.

Early in 1975 Oconee III was placed in operation making Oconee the largest nuclear generating station in the United States.

It is interesting to note that generating stations constructed in recent years by South Carolina Utilities have been among the most efficient in the United States and recently Duke Power Company was reported to have the second most efficient generating system in this Country, as well as the most efficient generating unit.

## RATES

The downward trend in electric rates enjoyed by the average residential electric consumer in recent years has leveled off. The rapidly rising costs of all things necessary in providing good service has required rate increases in order to protect the financial condition of the several electric companies, so that the companies can continue to finance, at a reasonable rate, the many additions required in providing good service.

During 1974 the 602,661 residential customers in South Carolina served by the privately-owned electric utilities paid \$181,452,693 for 6,523,911,043 kilowatt-hours. The average South Carolina customer used 10,825 kilowatt-hours during the year, for which he paid a total of \$301.09, at an average rate of 2.78 cents per kilowatt-hour, as compared to the average customer throughout the United States, who used 7,907 kilowatt-hours for which he paid a total of \$223.77 at an average rate of 2.83 cents per kilowatt-hour during 1974.

The average residential customer in South Carolina served by the privately-owned utilities pays an annual bill which is about 25% higher than average United States residential customers pay, but the South Carolina average residential customer receives 38.4% more power for the 25% increase in his annual bill.

The average rate paid in South Carolina is slightly lower than the average rate paid by all residential customers in the United States, including those customers in the Tennessee Valley and other areas where publicly-owned power is provided. In South Carolina, if Santee-Cooper residential statistics were included with those of the privately-owned utilities, the South Carolina average rate probably would be even lower.

There are 2,735 large industrial customers of the privately-owned utilities in South Carolina who purchased 12,423,553,533 kilowatt-hours at an average rate of 1.257 cents per kilowatt-hour, which is well below the power rates in a large part of this nation.

Industries now located within South Carolina and other industries desiring reasonable electric power rates will find that electric power can be secured throughout practically the entire State at very reasonable rates.

### RURAL ELECTRIFICATION

The growth of rural electrification in South Carolina has been very rapid. There are now nearly half a million rural and suburban electric customers in South Carolina receiving central station service; that is, they are served by the same generating stations that serve the urban customers. It is believed that practically every rural and suburban home in South Carolina that desires electric service now has or can secure electric service. Of course there are isolated cases where several miles of line would be required to serve a single home far removed from other homes, or even a fishing shack on a river, and where the cost of providing service is greatly out of proportion to the use to be made of electric service.

The big job left to be done is in connecting those customers living on present lines, who for various reasons, have not secured electric service and those new customers who build new homes adjacent to present lines and in increasing the capacity of present lines to take care of the greatly increased loads due to the use of more and more time saving and money-saving convenient electric appliances.

The Commission and staff have always worked with all potential electric consumers and have helped thousands of them to secure central station electric service.

### RURAL TERRITORY ACT

The General Assembly passed the "Rural Territory Act" in 1969 and the Commission, pursuant to the Act has required all "Electric Suppliers" to file maps with the Commission showing rural electric lines in existence as of July 1, 1969. As of July 1, 1971, mylar maps of all counties in South Carolina had been filed with the Commission and negotiations between the several "Electric Suppliers" was begun.

Territory in practically all of South Carolina has been agreed upon by the "Electric Suppliers", and Orders approving the allocation of territory have been issued by the Commission.

## SITING ACT

The 1971 General Assembly passed an Act to give the Commission authority over "UTILITY FACILITY SITING AND ENVIRONMENTAL PROTECTION" effective January 1, 1972. The Commission has issued one Certificate under this Act for the construction and operation of a combustion turbine generating plant in Darlington County and to Duke Power Company for the construction and operation of the Catawba Nuclear Generating Plant in York County. Applications have been received from Carolina, Duke and S. C. Electric and Gas for the construction of 230 KV and 525 KV transmission lines and Certificates for the construction of these lines have been issued. Other Applications have been received, and Hearings have been set to consider these Applications.

The larger utilities are now advising the Commission of planned construction within the next ten years and of probable construction within the next twenty years.

Engineers in the Electric Department perform such other duties as assigned by the Commission.

A number of statistical tables and charts are included in this report to show the growth and health of the electrical utilities under jurisdiction of this Commission.

## ACCOUNTING DEPARTMENT

The Accounting Department consists of eight accountants who report to an Accounting Manager.

The primary function of the Accounting Department is to audit a utility company prior to a rate increase hearing before the Commission. A rate case audit is different from an audit by the Company's CPA firm in that Accounting principles and procedures must be based upon regulatory law. Rate case exhibits must be based upon a "normal" year. Adjustments need to be made to the test year in order to arrive at a more meaningful basis for the Commissioners to decide upon an equitable rate of return on company investments. Company exhibits are tested by checking procedures and by sampling techniques. Company adjustments to the test year must be closely checked for propriety. The Staff makes additional adjustments to arrive at a "normal" year. Other exhibits are prepared by the Staff to point out strengths and weaknesses of the Company. After the audit and when adjustments and exhibits are prepared a formal report is issued by the Accounting Staff for the hearing.

The Accounting Staff has incurred the additional responsibility of auditing the operating Fossil Fuel Clause. The audit of the fuel clauses requires sampling of invoices and checking procedures throughout the year.

Conferences and schools were attended by the Staff to maintain professional expertise, share problems and keep current on new developments.

The Accounting Staff prepares statistical data at various times for other states, Federal Power Commission, National Association of Regulatory Utility Commissioners and other interested parties.

During the year, the Accounting Staff has been increasingly called to testify for hearings before the Commission.

The increase in the number of rate cases, the requirements for fossil fuel audits, and the rising number of reports and analyses resulting from consumer demand has necessitated the use of the Auditape. This is a computer audit package developed and marketed by Haskins and Sells, CPA's which can select statistical samples, prepare extensions, provide additional audit control, and perform additional audit procedures. This has aided the Accounting Staff in accomplishing audit objectives more efficiently.

## **RATE CASES DURING 1974-1975**

1. Carolina Power and Light Company
2. Carolina Water Service
3. Duke Power Company
4. Glendale Water Company
5. Heater Utilities
6. Hilton Head Water Company
7. Isle of Palms Water Company
8. Lockhart Power Company
9. Pimlico Utility Company
10. Piney Grove Utility Company
11. Pond Branch Telephone Company
12. St. Matthews Telephone Company
13. South Carolina Electric and Gas Company
14. Southeastern Water Corporation
15. Southern Bell Telephone and Telegraph Company
16. Terraceway Service Corporation
17. Tranquil Utilities
18. United Cities Gas Company
19. Utilities, Incorporated
20. Westoe Plantation Land Company

The electric utilities are required to have the approval of the Commission on financing with maturity date of more than one year.

The following is a list of the various securities applied for and authority granted for the issuance thereof:

### **South Carolina Electric & Gas Company Columbia, South Carolina**

To issue and sell not to exceed thirty-five million dollars (\$35,000,000) of its First and Refunding Mortgage Bonds, 10½% Series, due July 1, 1979, for the repayment of a portion of the Company's short-term indebtedness resulting from construction expenditures.

To issue and sell 2,360,000 shares of \$4.50 par value common stock, proceeds to be used for the repayment of a portion of outstanding short-term indebtedness resulting from construction expenditures, except that \$8,000,000 of such proceeds may be used to retire a like amount of first mortgage bonds at their maturity on January 1, 1975.

To issue and sell fifteen million dollars (\$15,000,000), principal amount of its First and Refunding Mortgage Bonds, 10.50% Series

due May 1, 1990, proceeds from the sale of the Bonds for repayment of short-term indebtedness resulting from construction expenditures.

To issue an additional three million four hundred eighty thousand dollars, (\$3,480,000) principal amount of First and Refunding Mortgage Bonds, 3% Series due April 1, 1980, for sinking fund requirements.

**Carolina Power & Light Company  
Raleigh, North Carolina**

To issue and sell \$50,000,000 aggregate principal amount of First Mortgage Bonds, 11½% Series due 1994, proceeds to be used for general corporate purposes.

To issue and sell 4,000,000 additional shares of its Common Stock, without par value, proceeds to be used for general corporate purposes.

To issue and sell not to exceed 2,000,000 shares of its Preference Stock, Series A, without par value, proceeds to be used for general corporate purposes.

To issue and sell \$100,000,000 First Mortgage Bonds, 11% Series due April 15, 1984, proceeds to be used for general corporate purposes.

**Duke Power Company  
Charlotte, North Carolina**

To issue and sell a maximum of \$100,000,000 principal amount of Intermediate-Term Notes, maturing in at least one year but not more than five years. The net proceeds from the sale of the notes will be applied and used by the Company to finance the cost of construction and to retire a portion of outstanding short-term obligation incurred for construction purposes.

To issue and sell a maximum of 4,000,000 additional shares of common stock without nominal or par value, proceeds to be used to finance the cost of construction.

To issue and sell a maximum of 2,400,000 shares of 10.76% of New Preferred Stock A, of the par value of \$25.00 per share.

To enter into a seven-year loan transaction, in the principal amount of \$14,848,800, secured by a lien on certain equipment, proceeds to be used to finance the cost of construction.

To issue and sell a maximum of \$100,000,000 principal amount of First and Refunding Mortgage Bonds, 9½% Series Due 2005, proceeds to be used to finance the cost of construction.

To issue and sell a maximum of 5,000,000 additional shares of common stock without nominal or par value to finance the cost of construction.

To issue and sell a maximum of 700,000 additional shares of common stock without nominal or par value pursuant to its Dividend Reinvestment and Stock Purchase Plan.

To issue and sell 1,000,000 additional shares of common stock, without par value, pursuant to its Stock Purchase-Savings Program for employees.

To issue and sell a maximum of \$125,000,000 principal amount of First & Refunding Mortgage Bonds, 11% Series due July 1, 1994, proceeds to be used to finance construction program.

The Accounting Department has prepared tables showing operating revenues, operating expenses, net operating income, state and local taxes paid, and gross plant in service for South Carolina operations only, for Electric, Gas, Telephone & Telegraph, Mobile Communications, Water, and Sewerage Utilities operating in South Carolina.

The tables are as follows:

TABLE A—Privately Owned Electric Utilities Operating in South Carolina. Selected Statistics for South Carolina Only. For the Years Ended December 31, 1971-1974.

TABLE B—Gas Utilities Operating in South Carolina. Selected Statistics for South Carolina Only. For the Years Ended December 31, 1971-1974.

TABLE C—Telephone & Telegraph Utilities Operating in South Carolina. Selected Statistics for South Carolina Only. For the Years Ended December 31, 1973-1974.

TABLE D—Mobile Communications Utilities in South Carolina. Selected Statistics for South Carolina Only. For the Year Ended December 31, 1974.

TABLE E—Water Utilities Operating in South Carolina. Selected Statistics for South Carolina Only. For Fiscal and Calendar Year 1974.

TABLE F—Sewerage Utilities Operating in South Carolina. Selected Statistics for South Carolina Only. For Fiscal and Calendar Year 1974.

PRIVATELY-OWNED ELECTRIC UTILITIES OPERATING IN SOUTH CAROLINA

## TRANSPORTATION DIVISION

Administration—The duty of this Division is to enforce the Motor Vehicle Carrier Law of the State, Sections 58-1401—58-1501 of the South Carolina Code of Laws, 1962, as amended. The Law provides for the regulation, supervision and control of persons, firms, corporations, etc., operating motor vehicles used in the business of transporting persons or property for compensation over the highways of the State, and imposes license fees to cover the cost of administration.

During the period of this report, a Notice of Filing on ninety applications was sent to affected parties. Hearings were set on seventy-two applications and sixty-eight hearings were held and four hearings were postponed indefinitely. No hearing has been set on eighteen applications as applicants have not complied with the requirements of the Commission. In connection with motor transportation matters after hearings were held, fifty-six Orders were issued.

In connection with Class C (special trip taxi), one application was heard and denied. Thirty-six applications for Class E (motor freight service over irregular routes) were heard, of which twenty were granted, eight denied, three withdrawn, and five are pending. Fifteen applications to amend Class E Certificates were heard, of which nine were granted, one denied, two withdrawn, and three are pending. One hearing was held on an application for a Class E Certificate, Restricted to Interstate Commerce Only, and this matter is pending. One application for a Restricted Class E Certificate was heard and granted.

Nine applications for Class F (motor freight service under contract) Certificates were heard, of which five were granted, two denied, one withdrawn, and one is pending. Four applications to amend Class F Certificates were heard, of which two were granted, one is pending, and one application to amend a Certificate and transfer the same is pending.

One Rule to Show Cause why Certificates of Public Convenience and Necessity should not be revoked for failure to comply with the Motor Vehicle Carrier Law of South Carolina, was issued against seventy-eight carriers, resulting as follows: Rule against one Restricted Class A Certificate holder was dismissed and four Certificates were cancelled. Rules against three Class C Certificate holders were dismissed and seven Certificates were revoked. Rule against one Class D, Interstate Only, Certificate holder was dismissed. Rules against five Class E Certificate holders were dismissed, two Certificates were

cancelled by request, one Certificate was suspended, and ten Certificates were revoked. Rules against three Class E, Interstate Only, Certificates were dismissed, two Certificates cancelled on request, and three revoked. Rules against six Class F Certificate holders were dismissed, three Certificates cancelled on request, two suspended and twenty-six revoked.

In addition to matters which were disposed of after public hearing, four hundred seventy-one Orders were issued disposing of motor transportation matters without hearings. In connection with Class A (regular route bus) carriers, one Certificate was suspended. Twenty-five Restricted Class A Certificates were granted, one suspended, twelve cancelled and two reinstated.

In connection with Class B (regular route bus irregular schedule) carriers, one Certificate was transferred.

In connection with Class C (special trip taxi), one hundred and sixty-eight Certificates were granted, one amended, one transferred, one suspended, ninety-two cancelled and one reinstated.

In connection with Restricted Class D (regular route carrier) Certificates, one was suspended. One Class D, Interstate Only, Certificate was transferred.

In connection with Class E forty Certificates were granted, sixteen amended, and eight applications dismissed. Fifty-four Orders were issued transferring forty-one Certificates. Eighteen Class E Certificates were suspended and eleven were cancelled. Four Class E Certificates were leased and one lease was terminated. Sale of Stock under one Certificate was approved, and six petitions for rehearing were denied. One petition for reconsideration was granted, one petition for oral argument was granted, one hearing was rescheduled and two Orders were issued denying four petitions for public hearing. One Restricted Class E Certificate was transferred. Seven Class E, Interstate Only, Certificates were granted, two transferred and one cancelled.

In addition to the above, two Orders affecting Class E Certificates were issued and rescinded by two subsequent Orders.

In connection with Class F, twenty-four were granted and thirty-two amended. Three Certificates were transferred, eleven suspended, twenty-three cancelled and four reinstated.

The Transportation Division has jurisdiction over city bus transportation where the bus service supersedes electric street railway transportation. This gives the Commission jurisdiction over city bus

transportation in Anderson, Charleston, Columbia, Greenville and Spartanburg, S. C.

Gasoline and diesel buses are operated in South Carolina by the Duke Power Company at Anderson and Spartanburg, by the Greenville City Coach Lines, Inc., at Greenville and by the South Carolina Electric and Gas Company at Charleston and Columbia, S. C.

During the year 1974, the above named bus companies transported 12,795,338 passengers as compared to 14,037,554 in 1973. This was a decrease of 1,242,216 passengers in 1974 compared to 1973.

During the fiscal year 1974-75, a number of changes were made in bus routes and schedules in order to make the most economical use of the facilities of various bus transportation companies operating in this State.

With the growth of the motor carrier industry in this State, together with the better enforcement of the Motor Carrier Law made possible by increased enforcement facilities, the work of this Division has rapidly increased, as evidenced by revenue receipts as shown in the following, through the fiscal year 1962-1963. However, beginning in 1962 the General Assembly for three successive years, passed legislation which reduced license fees for Class D, E, and F Certificate holders by twenty-five per cent per year. This reduction is shown in the revenue as collected since that time along with a portion of the motor vehicle registration fees collected by the South Carolina Tax Commission and credited to the Motor Transportation Fund beginning with the fiscal year 1962-1963.

## REGISTRATION AND SAFETY DEPARTMENT

### Registration of Certified and Exempt Commodity Interstate Motor Carriers (Public Law 89-170—Section 58-1444)

On April 16, 1971, the South Carolina Motor Vehicle Carrier Law was amended by adding Section 58-1444 governing the operation of interstate carriers certificated by the Interstate Commerce Commission and exempt commodity carriers. Section 58-1444 authorized the South Carolina Public Service Commission to promulgate rules and regulations pursuant to this Act. The Rules promulgated complied with the standards as recommended and approved by the National Association of Regulatory Utility Commissioners and the Interstate Commerce Commission.

Carriers coming under this category are charged a registration fee of \$25.00, any amendment to the authority as registered \$10.00. Mobile Home Transporters are charged one-half the amendment fee or \$5.00. All trucks operating into or through South Carolina under Section 58-1444 must purchase an identification stamp at \$1.00 per truck.

Under the same Section, all exempt commodity carriers operating into or through South Carolina must file a letter with this Commission setting forth the exempt commodities to be transported. These fees are identical to those of Certificated carriers. All funds derived from such fees and charges are to be retained by the Commission and expended by it to control and police illegal transportation and promote safety on the highway.

During the period of July 1, 1974 through June 30, 1975, 223 Certificated carriers registered their authority with this Commission. Prior registrants were 1,470 making a total of 1,693 registered Certificated carriers. There were 553 registrants of additional authority with this Commission. For the same period 1,620 Exempt Carriers registered their letters of exemption. Prior registrants were 4,950 making a total of 6,570 registered Exempt carriers.

Balance From Previous Years .....	\$206,700.00
Revenues From Certificated Carriers ...	\$172,137.00
Revenues From Exempt Carriers .....	61,755.00
Total Revenue from 7-1-74 through 6-30-75 .....	233,892.00
Total .....	\$440,592.00
Expenditures this Division .....	\$233,871.00
Balance carried forward to 1975-1976 .....	\$206,721.00

The enforcement of this Law and check of all trucks on the road for safety purposes will be done by the Inspectors in the field.
